Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions that are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-18 and 20-28, drawn to a first method of making a plant artificial chromosome, comprising preparing recombinant protoplasts of a first plant species, producing chromosome fragments of the chromosomes within the protoplasts, and fusing the protoplasts with protoplasts of a second plant species; or said method wherein a whole plant is regenerated from the fused protoplasts; and a first product, isolated plant cells or protoplasts containing at least one plant chromosome fragment produced by the first method, or protoplasts, plant cells, or plants produced by the method.

Group II, claim(s) 19 and 29, drawn to a second method, of making a plant artificial chromosome comprising producing transformed plants of a first plant species, producing chromosome fragments of chromosomes of the first plant species, crossing the first plant species containing the chromosome fragments with a second plant species; and a second product, a hybrid plant species or cells or protoplasts thereof produced by the second method.

Group III, claim(s) 30-34, drawn to a third product, a recombinant nucleic acid comprising a first centromeric sequence functional in a plant cell and a second centromeric sequence functional in a yeast cell; a recombinant vector comprising said nucleic acid; a recombinant plant cell comprising said vector.

Group IV, claim(s) 30-33 and 35, drawn to a fourth product, a recombinant nucleic acid comprising a first centromeric sequence functional in a plant cell and a second centromeric sequence functional in a yeast cell; a recombinant vector comprising said nucleic acid; a recombinant yeast cell comprising said vector.

The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: recombinant protoplasts of the method of Group I is not shared with the method of Group II. The fusing of protoplasts of the method of Group I and the products of the method of Group I are not shared with the recombinant nucleic acid of Groups III and IV. The transformed plants of the method of Group II and the products of the

Art Unit: 1638

method of Group II are not shared with the recombinant nucleic acid of Groups III and IV. The plant cell of Group III is not shared with the yeast cell of Group IV.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
